

REPORT OF EXAMINATION OF ALASKA SALMON STREAM

Department of Commerce  
Bureau of Fisheries.

Name of stream. Toger Creek, Lancaster Cove. Date examined. From July 2 to August 23, 1926.

Location Two miles East of Hump Island Fox Farms.  
Chomley Sound, Prince of Wales Island.

Approximate length.  $1\frac{1}{2}$  miles. Width. Six feet. Depth. Five inches  
At medium flow.

Condition and stage. (Whether clear, high, low, etc.) Clear.

Lakes, if any, size, character, and whether accessible from sea. No Lake.

Salmon run (heavy, light, average, etc.) Light, about 800 in stream last time examined.

Date and duration of run of each species. July 1 to 15 November.

Estimated number of each kind of salmon on spawning beds or in stream. Dogs 75 per cent, 25 per cent humpies.

Former size of run of each species and evidence of depletion, if any. Suppose about 20,000 spawned here last year.

Natural barriers and whether removable. There are a number of wind falls which should be removed at entrance 1,000 yards up stream.

Where markers are placed. No markers.

Remarks, sketches, etc. This stream is at Lancaster Cove, has a fine gravel bottom and is a fine spawning stream. The largest haul made this year was from July 10, 700 feet from entrance to stream 8,000 were caught, of which 60 per cent were dogs and 40 per cent humps.

Charles H. Harrison,  
Power Boat Patrol.
